

§ 661.41 What does a complete application package consist of?

A complete application package would consist of the following: the FHWA or BIADOT PS&E approval letter, certification checklist and IRRBP TIP. In addition to the preceding items, for non-BIA IRR bridges, the application package must also include a tribal resolution supporting the project.

§ 661.43 How are the FY 1998 projects to be treated?

In order not to penalize any BIA area office which completed PS&E packages in FY 1998 that were not funded because the project selection/fund allocation procedures for distribution of funds for FY 1998 were not in place, the funds for approved projects would be made available to the BIA area offices on receipt and acceptance of their application packages.

§ 661.45 How is a list of deficient bridges to be generated?

(a) In consultation with the BIA, a list of deficient BIA IRR bridges will be developed each fiscal year by the FHWA based on the annual April update of the NBI. The NBI is based on data from the inspection of all bridges. Likewise, a list of non-BIA IRR bridges will be obtained from the NBI. These lists would form the basis for identifying bridges that would be considered potentially eligible for participation in the IRRBP. Two separate master bridge lists (one each for BIA and non-BIA IRR bridges) will be developed and will include, at a minimum, the following:

- (1) Sufficiency rating (SR);
- (2) Status (structurally deficient or functionally obsolete);
- (3) Average daily traffic (NBI item 29);
- (4) Detour length (NBI item 19); and
- (5) Truck average daily traffic (NBI item 109).

(b) These lists would be provided by the FHWA to the BIADOT for publication and notification of affected BIA area offices, Indian tribal governments (ITG)s, and State and local governments.

(c) BIA area offices in consultation with ITGs, are encouraged to prioritize

the design for bridges that are structurally deficient over bridges that are simply functionally obsolete, since the former is more critical structurally than the latter. Bridges that have higher average daily traffic (ADT) should be considered before those that have lower ADT. Detour length should also be a factor in selection and submittal of bridges, with those having a higher detour length being of greater concern. Lastly, bridges with higher truck ADT should take precedence over those which have lower truck ADT. Other items of note should be whether school buses use the bridge and the types of trucks that may cross the bridge and the loads imposed.

§ 661.47 In the event of project cost over runs, how would they be funded?

(a) Because of the critical nature of this program, BIA area road engineer (ARE) approved costs in excess of the project estimate could be funded out of this program depending on the availability of funds and subject to BIADOT/FLH project approval procedures. The ARE would request additional IRRBP funding for a specific bridge project and submit a request with appropriate justification along with an explanation as to why this additional IRRBP funding is necessary.

(b) In addition, project cost over runs may be funded out of regular IRR program funds.

§ 661.49 Could regular IRR funds be used to fund a bridge project?

Yes. Regular IRR construction funds can be used to fund a bridge project with the concurrence of the FHWA, BIADOT and the BIA ARE.

§ 661.51 Could bridge maintenance be performed with these funds?

No. Bridge maintenance repairs would not be within the scope of funding, e.g., guard rail repair, deck repairs, repair of traffic control devices, striping, cleaning scuppers, deck sweeping, snow and debris removal, etc. There are maintenance funds available through annual Department of the Interior appropriations for use on BIA owned bridges. The Department of the Interior maintenance funds

would be the appropriate funding source for bridge maintenance.

PART 667 [RESERVED]

PART 668—EMERGENCY RELIEF PROGRAM

Subpart A—Procedures for Federal-Aid Highways

Sec.

- 668.101 Purpose.
- 668.103 Definitions.
- 668.105 Policy.
- 668.107 Federal share payable.
- 668.109 Eligibility.
- 668.111 Application procedures.
- 668.113 Program and project procedures.

Subpart B—Procedures for Federal Agencies for Federal Roads

- 668.201 Purpose.
- 668.203 Definitions.
- 668.205 Policy.
- 668.207 Federal share payable from emergency fund.
- 668.209 Eligibility of work.
- 668.211 Notification, damage assessment, and finding.
- 668.213 Application procedures.
- 668.215 Programming and project procedures.

AUTHORITY: 23 U.S.C. 101, 120(e), 125 and 315; 49 CFR 1.48(b).

Subpart A—Procedures for Federal-Aid Highways

SOURCE: 52 FR 21948, June 10, 1987, unless otherwise noted.

§ 668.101 Purpose.

To establish policy and provide program guidance for the administration of emergency funds for the repair or reconstruction of Federal-aid highways, which are found to have suffered serious damage by natural disasters over a wide area or serious damage from catastrophic failures. Guidance for application by Federal agencies for reconstruction of Federal roads that are not part of the Federal-aid highways is contained in 23 CFR part 668, subpart B.

[52 FR 21948, June 10, 1987, as amended at 61 FR 67212, Dec. 20, 1996]

§ 668.103 Definitions.

In addition to others contained in 23 U.S.C. 101(a), the following definitions shall apply as used in this regulation:

Applicant. The State highway agency is the applicant for Federal assistance under 23 U.S.C. 125 for State highways and local roads and streets which are a part of the Federal-aid highways.

Catastrophic failure. The sudden failure of a major element or segment of the highway system due to an external cause. The failure must not be primarily attributable to gradual and progressive deterioration or lack of proper maintenance. The closure of a facility because of imminent danger of collapse is not in itself a sudden failure.

Emergency repairs. Those repairs including temporary traffic operations undertaken during or immediately following the disaster occurrence for the purpose of:

- (1) Minimizing the extent of the damage,
- (2) Protecting remaining facilities, or
- (3) Restoring essential travel.

External cause. An outside force or phenomenon which is separate from the damaged element and not primarily the result of existing conditions.

Heavy maintenance. Work usually done by highway agencies in repairing damage normally expected from seasonal and occasionally unusual natural conditions or occurrences. It includes work at a site required as a direct result of a disaster which can reasonably be accommodated by a State or local road authority's maintenance, emergency or contingency program.

Natural disaster. A sudden and unusual natural occurrence, including but not limited to intense rainfall, floods, hurricanes, tornadoes, tidal waves, landslides, volcanoes or earthquakes which cause serious damage.

Proclamation. A declaration of emergency by the Governor of the affected State.

Serious damage. Heavy, major or unusual damage to a highway which severely impairs the safety or usefulness of the highway or results in road closure. Serious damage must be beyond the scope of heavy maintenance.

State. Any one of the United States, the District of Columbia, Puerto Rico
